ONE OF A KIND! You will simply not find another house like this in the area or school district! This raised ranch was built with every bell and whistle by the current owner/occupant, so of course it's just stunning in its feel and amenities.

Start with the fact that this is an oversized raised ranch - you notice it immediately when you see the outside that has a Colonial feel, and also it's "proven" to you when you see the oversized, two-car garage because of the flat front of the house! This home has been updated and improved throughout the years, with many of the comforts you would expect, such as beautiful hardwood floors, granite countertops and travertine floors in the eat in kitchen, and expansive closets throughout. But also amenities you just wish you had - a wood burning stove, multi-layer decks and an above ground heated pool, surround sound throughout, and even a heater for that huge garage. Not to mention that this INCREDIBLE house is on almost 2.3 LEVEL acres!
